Guidance to applicants applying for a Registration Certificate / Storage Licence

Please complete the application form using either **black** ink or type. If there is insufficient room to provide the information requested please continue on a separate sheet(s). You should also put your name and address at the top of each sheet(s) before attaching the sheet(s) to your application form.

Please contact the Trading Standards Service on 01275 888634 if you have any questions about completing this form or about your application.

This form should only be used for explosives that do *not* require an explosive certificate – for example, fireworks, other pyrotechnic substances and articles, and small arms ammunition.

You can store up to 2,000kg (2 tonnes) of explosives under a **licence** from your local authority. If you wish to store more than 2,000kg you will need a licence from the Health & Safety Executive.

The maximum quantities that can be stored under a **registration** are:

- 250 kilograms of small arms ammunition and percussion caps and 30 kilograms of shooters' powder;
- 250 kilograms of Hazard Type 4 explosives (eg most consumer fireworks and other pyrotechnic articles).

If you are keeping any of the more powerful Hazard Type 3 explosives then the quantities are reduced to 100 kg. If you are keeping any Hazard Type 1 explosives the quantity reduces to 30 kg.

Please seek further advice from your supplier if you are uncertain about the hazard type of the substances you wish to store.

The quantities referred to are the '**net mass**' of the explosives. This means the weight of the explosive contained within an article (ie less packaging, casings etc). In the case of fireworks and other pyrotechnic articles this is assumed to be one quarter of the gross weight of the article – unless you have more specific information from the supplier.

If the store location does not have a postal address (eg a store in a field) please include a map (1:25000) showing its location. The licensing authority may also wish to see a floor plan of the sales area if you plan to store or display more than 12.5 kg of fireworks there.

Period of validity: registration certificates for fireworks and other explosives that do not require an explosive certificate are normally renewed annually on a common renewal date in September or October. Initial applications may be granted for a period longer than one year so that they fall due for renewal on the common renewal date. For example, an applicant applying in June might be granted a licence for 15 months to expire in September of the following year.

Important notes

It is your responsibility to ensure you are aware of, and complying with the regulations on the manufacture and storage of explosives.

The licensing authority will not normally visit your premises before granting a registration. The authority may prohibit storage of explosives at the site if it believes the site is unsafe. It may also take enforcement action if you are not storing safely.

If you are planning to sell fireworks outside certain limited periods of the year you may also need a licence under the Fireworks Regulations 2004. Your supplier or local licensing authority will be able to advise.
